Practice Quiz 3-C

1. Identify whether the slope is positive, negative, zero, or undefined. Then find the slope.a) y = x - 2b) x = 32c) y = 1

d) 4y - 5x = 8

e) the line passing through the points (-1, 5) and (8, 0)

2. Convert the equation to slope intercept form. Then use the slope and the *y*-intercept to graph the line. a) 8x + 3y = 3

3. Find the intercepts of the line. Then connect them to graph the line. a) 6x - 4y = 20
