

Math 2 Fall Final Outline

2020

Format: On paper

Notes: Unlimited online and paper notes

Points: 100 (about 20% of the semester grade)

Working with others: You may not communicate with anyone during the final.

Length: Approximately 10 questions

Topics: Almost all of the problems on the final will be from or directly related to the final review done in class the week before the final (but with different numbers). If you understand and can do the problems on these three pages, you are prepared for the final.

Showing Work: Like the quizzes, the final will be graded mostly on the work shown. Correct answers with minimal or incorrect work will get only a small amount of points. Each problem will have a checklist for you to make sure you have not left anything out that is being scored.

Academic Integrity: To encourage academic honesty, a random sample of students may be selected to explain one or more of their answers after they turn in the test. In addition, students who score much higher on the final than their previous grade in the course may be added to this sample. Please do not write anything if you can't explain how you got it!
